-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is in response to the application filed 1/23/2004.
2. Claims 1-10 have been examined and are pending in the application.

Allowable Subject Matter

3. Claims 3-8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hammond U.S Patent No. 6,463,583.

As to claim 1, Hammond teaches (line 46 column 5 to line 15 column 6) a shared library call method for a computer for executing an operating system which loads application programs and shared libraries in the same virtual space and manages a memory so as to make each application program have a specific virtual space, said method comprising the steps of:

hooking a call (an injection hook function, line 67 column 5) to a function in said shared library from said application program, the call being hooked by an injection shared library (an injection dynamic link library, line 56 column 5);

in response to hooking the call, calling a module stored in a kernel region of said memory; and executing at least one process in accordance with information set in said called module, and thereafter calling the function in said shared library (line 46 column 5 to line 15 column 6).

As to claim 2, Hammond further teaches said module records a content of said hooked call to said shared library in said kernel region (line 56 column 8 to line 3 column 9).

As to claim 9, it is a system claim of claim 1. Therefore, it is rejected for the same reasons as claim 1 above.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
